

LUYAO NIU (SHE/HER)

PhD student, University of Southern California
luyaoniu@usc.edu | [Academic homepage](#)

EDUCATION

University of Southern California

PhD · Transportation Systems Engineering | 2026.08–present

Peking University

M.Sc. · Urban Planning / Smart City & Big Data | 2023–2026

Beijing Jiaotong University

B.Sc. · Traffic Engineering; minor in Finance | 2019–2023

RESEARCH INTERESTS

Learning, decision-making, and coordination in intelligent systems, with a growing focus on multi-agent and autonomous systems.

Learning & Reasoning | Multi-Agent Decision-Making | Coordination & Collective Intelligence

Current topic at USC: Coalition coordination in mixed-autonomy traffic

When should autonomous-vehicle firms route independently, coordinate in partial coalitions, or share a common dispatcher? I study how these organizational choices affect traffic equilibrium and network performance when human drivers also adapt their routes.

SELECTED RESEARCH EXPERIENCE

Coalition Coordination in Mixed-Autonomy Traffic |

- Question: Studies when autonomous-vehicle firms should route independently, coordinate in partial coalitions, or share a common dispatcher when human drivers also adapt their routes.
- Approach: Models heterogeneous routing organizations through mixed Nash-Wardrop equilibrium and compares their operational implications under fixed network and demand conditions.

Event-CausNet: Reliable Spatio-Temporal Forecasting |

- Question: Examines how unstructured event reports can improve traffic forecasts during non-recurring events.
- Approach: Uses language models to extract event factors and combines causal knowledge with spatio-temporal forecasting. Submitted to KDD 2027.

AskNearby: Community Information Retrieval and Recommendation |

- Question: Addresses local information accessibility by combining neighborhood knowledge with individual context and preferences.
- Approach: Built a multi-layer retrieval pipeline spanning knowledge-graph retrieval, semantic-vector recall, and geographic filtering. ACM SIGSPATIAL GeoAI 2025 oral presentation.

PROFESSIONAL EXPERIENCE

AI Agent Engineering Intern | May - Aug. 2026

Xiaohongshu · Data Analytics

- Domain knowledge infrastructure: Built a domain-specific data analytics knowledge base to support knowledge-grounded agent workflows.
- Agent architecture and development: Developed agent frameworks and data-analysis workflows that connect knowledge resources with domain capabilities.
- Validation and Skill operations: Validated end-to-end agent behavior and analytical outputs; designed, evaluated, monitored, and operated reusable domain Skills.

Co-founder | Dec. 2024 - Present

Qianmo Zhilian (Shenzhen) Technology Co., Ltd.

- AskNearby: Co-founded and led development of an LLM-powered community information platform combining RAG and spatio-temporal data.
- Recognition: The project received a Gold Award at the Nanshan District Innovation & Entrepreneurship Competition and Third Prize at the Baidu ERNIE Cup.

Research Assistant | Jan. 2025 - Present

Data Science Department, Duke Kunshan University · Suzhou, China

- Research leadership: Led independent research on spatio-temporal data mining, traffic forecasting, and behavioral modeling.
- Research output: First-authored work published at IEEE GLOBECOM; Event-CausNet submitted to KDD 2027.

LLM Algorithm R&D | Apr. 2025 - Jan. 2026

China Academy of Land Surveying and Planning · Collaborative project

- Knowledge and reporting agents: Led the RAG retrieval module for a policy knowledge base and developed an LLM-agent reporting workflow.
- Workflow impact: The reporting workflow reduced initial-draft preparation time by more than 90%.

AWARDS & ACADEMIC SERVICE

Scholarships & honors

- Baosteel Outstanding Student Award (500 recipients nationwide / year), 2022.12
- National Scholarship (highest undergraduate honor in China, top 1%), 2020.12
- First-class Academic Scholarship (top 3%), 2020.12
- Beijing Outstanding Graduate

Competition awards

- First Prize, National University Traffic Science & Technology Competition, 2022.07
- Second Prize, China MathorCup Mathematical Modeling Competition, 2022.04
- Third Prize, China College Mathematics Competition, 2020.04
- Third Prize, Baidu ERNIE Cup AI Entrepreneurship Competition, 2024.09
- Gold Award, Nanshan District Innovation & Entrepreneurship Competition

Academic Service

Peer Reviewer: WSDM · IEEE GLOBECOM · Transportation Research Board (TRB)

LEADERSHIP & SERVICE

President, Student Union | Beijing Jiaotong University | Jun. 2021 - Jun. 2023

Led university-wide student affairs and brand events reaching 80,000+ participants.

Volunteer, Beijing 2022 Winter Olympics | National Indoor Stadium | Jan. 2022 - Apr. 2022

Personnel management and venue operations; named Outstanding Volunteer.
